Consent Form

Community Eye Outreach Program

The Eye Clinic at the Shanghai United Family Hospital is committed to educating patients on good eye health. Our optometrist will be attending your child's school to complete the basic eye screening for the children on **Thursday 26th October 2017**. Each eye screening will be completed by a qualified optometrist from our hospital and will follow international infection control standards.

Please note that this eye screening does not replace a full eye examination in our eye clinic. Good eye health, reinforced by a full eye examination, is important for a child's general health. The examination is a non-invasive, painless procedure that all children should undergo on a regular basis.

Our ophthalmologist will advise parents in writing, if they feel any further treatment is required. You are then free to choose where or if your child has the treatment recommended.

If you are happy for your child to have the eye screening please sign the below consent form and **return to the school before Thursday 28th September 2017**.
